RESISTOGRAPH SERVICES

TREE CONSULTANCY

Contact us for a consultancy session where we will analyse, evaluate and electronically test your problem tree.

Ace of Spades utilising best practice testing using up-to-date resistograph techniques.

The above tree was shown to have serious internal rotting and was deemed to be dangerous.

The image above shows the extent of the rotting of this tree and indicates that it was removed at an appropriate time thus eliminating any danger from an unexpected fall.

Resistograph technology is not only used to determine the trees structural integrity it also can test for weaknesses in forks and branches which may cause future problems.
